

## Nurse Clinics

We offer free nurse clinics (medication not included). Typical nurse consultations may cover:

- General advise including puppy, kitten and senior pet checks
- Post operative checks
- Suture removal
- Nail clipping
- Anal gland expressing
- Dental checks
- Weight management
- Worming and flea treatment advice

Please note that there is a small charge for nurse bandage changes due to the time required.

For the past year nurses have welcomed donations for a different monthly charity as a gesture for the free nurse consultation. Large sums have been raised for charity and the Isle Veterinary Group sincerely thanks everyone who has so generously donated.
